

Catalog Number

49225-65-C

Tubing, PTFE, 1/16th inch (1.6 mm) ID, 1/8th inch (3.2 mm) OD, low pressure, 25 meter roll, ARE-Applied Research brand. 1 EA.

Additional Info

This thin-walled PTFE (*Polytetrafluoroethylene*) tubing is extruded from virgin PTFE. No additives are added to the original PTFE material.

This tubing is used widely in all low-pressure, laboratory applications including before and after an HPLC Pump such as with Mobile Phase Delivery and Solvent Waste Systems. Since PTFE tubing contains "micro-pores" in the tubing wall, which allows a quick air exchange, consideration for use with degassed and oxygen-sensitive solvents is needed.

- Internal and Outer Dimensional Tolerance: +/- 0.20mm
- Color: Natural, Translucent
- Wall Thickness: 0.80 mm
- Pressure rating: 510 psi (35 bar)
- Max Temperature: 260°C
- Supplied on a convenient spool.
