

Catalog Number

59300-01

HPLC Column, MicroBee C18, 10um, 3.9mm ID x 300mm Length,
125A. Cogent Brand. 1 EA.

Additional Info

This Cogent MicroBee C18™ Stationary Phase is part of the Similar product line that has been a premium value used by HPLC laboratories for many years.

The "Type-A" Stationary Phase is end capped along with traditional bonding of an 18-carbon straight chain ligand to irregular shaped silica. This makes this column an ideal Alternate in USP Methods that use the L1 Classification and Microbondapak™ or similar C18 columns.

Carbon load is 10%.

Used for hydrophobic or neutral compounds in Reversed Phase, this Octadecyl Phase is excellent for long chain fatty acids.

This is one of our Most Popular MicroBee C18 Columns.
