

Catalog Number

62518-10P-2

HPLC Column, Hyper Similar C18, 5um, 2.1mm ID x 100mm Length, 150A. Cogent Brand. 1 EA.

Additional Info

This Cogent Hyper Similar C18™ Stationary Phase is part of the Similar product line that has been a premium value used by HPLC laboratories for many years. The "Type-B" Stationary Phase is end capped along with traditional bonding of an 18 carbon straight chain ligand to spherical shaped silica with very similar surface area to Hypersil® or Spherisorb® columns. This makes it an ideal Alternate in USP Methods that use the L1 Classification and Thermo Fisher Hypersil™ Columns or Similar C18 Columns.

Used for hydrophobic or neutral compounds in Reversed Phase, this Octadecyl Phase is excellent for long chain fatty acids.

A very popular column size, this narrow-bore column provides good run times but requires a pump that can precisely deliver, and a flow cell that is made for reduced flow rates with lower volumes. This column size is excellent, and a favorite for LCMS.
