

## Catalog Number

68004-05P

**HPLC Column, RP C4 Butyl**, 10um, 4.6mm ID x 50mm Length, 100A.  
Cogent Brand. 1 EA.

### Additional Info

This Cogent RP C4™ Stationary Phase has been a premium value and used by HPLC laboratories for many years. It is double end capped (*fully*), with traditional bonding of a 4 (*butyl*) carbon ligand to the highest purity silica available, making this column ideal as an Alternate in USP Methods that use the L26 Classification.

With a 10 µm Particle, this column works well with higher flow rates and lower back pressures. Used for very hydrophobic or neutral compounds in Reversed Phase, this Butyl Phase is excellent for short analyses of small molecules. Expect Less retention than with a C8 column.

*This column is often used when scouting for preparative methods.*
