

Catalog Number

68524-15P-2

HPLC Column, RP Phenyl, 5um, 2.1mm ID x 150mm Length, 100A.
Cogent Brand. 1 EA.

Additional Info

This Cogent RP Phenyl™ HPLC Column has been a premium value and used by HPLC laboratories for many years. It is double end capped (*fully*), with traditional bonding of a 3 carbon linkage to a terminal Phenyl Ring to the highest purity silica available, making this column ideal as an Alternate in USP Methods that use the L11 Classification or in new method development and LCMS.

Used to separate Isomers (*positional*), Tocopherols, Flavonoids, Polynuclear Aromatics, Nitro-Aromatic Compounds, Active Pharmaceutical Ingredients (APIs), Natural Products and Related Compounds in Reversed Phase HPLC, these Phenyl Columns are an excellent choice.

This narrow-bore column provides good run times but requires a pump that can precisely deliver, and a flow cell that is made for reduced flow rates with lower volumes. This column size is a good choice for LCMS when more separation is needed.
