**Mobile Phase Filter, 5 um,** Last Drop, Stainless Steel, 22 mm diameter. Economy. ARE-Applied Research brand. 5/PK.

## **Additional Info**

These Last Drop, PTFE and Stainless Steel mobile phase filters are manufactured with a 5 um Stainless Steel filter element and will provide the highest filter capacity and throughput while using a maximum amount of solvent. The unique design allows for this flat filter to "vacuum" up to the "last drop of liquid" in the reservoir bottle.

The 5 um pore size element will filter undissolved particles from your solvents that are 5 um or larger preventing them from damaging your HPLC pumps, columns or instrument.

Install these filters directly in your mobile phase bottles. These filters are designed for use with 1/8-inch tubing.
