Product Sheet

Catalog Number

59008-25P

HPLC Column, MicroBee C8 Octyl, 10um, 4.6mm ID x 250mm Length, 125A. Cogent Brand. 1 EA.

MOST POPULAR.

Additional Info

This Cogent MicroBee C8[™] Octyl Stationary Phase is part of the Similars product line that has been a premium value used by HPLC laboratories for many years.

The "Type-A" Stationary Phase is end capped along with traditional bonding of an 8 carbon straight chain ligand to irregular shaped silica. This makes this column an ideal Alternate in USP Methods that use the L7 Classification and Microbondapak™ or similar C8 columns.

Used for hydrophobic or neutral compounds in Reversed Phase, this Octyl Phase is excellent for long chain fatty acids and will have less Retention than a C18 Column.
