Additional Info

First hydrolytic, Class A, Type N51A pharmaceutical grade, Borosilicate Glass, amberized. Amber glass is often used for light sensitive compounds and is considered low actinic.

This market leading 1.8ml vial has the low residual volume of 8ul due to the center-draining effects of smooth walls (no ledges) and a conical bottom, which allows needles with bottom entry ports to recover the maximum amount during use.

Bottom depths are designed and QC controlled for the most critical autosampler to prevent needles hitting the bottom of the vials. This product is manufactured in an ISO 9001:2015 Certified facility.
